PROFESSIONAL SUMMARY

Senior Data Analyst with 3+ years of experience delivering Business Intelligence, automation, and data engineering solutions. Skilled in SQL, Python, and Power BI, building end-to-end data solutions from integration and transformation to pipelines, dashboards, and automations that streamline operations and support business decision-making.

PROFESSIONAL EXPERIENCE

Nova Capital FIDC | Senior Data Analyst

Jan 2025 - Present

- Develop analytics solutions for credit, risk, sales, and portfolio management teams using Python, Streamlit, Power BI, SQL Server, and APIs.
- Built credit and payment-location risk analysis tools that reduced selected review workflows from approximately **30 minutes to under 10 minutes**.
- Created Power BI dashboards for portfolio management, sales performance, and market intelligence using data from the Brazilian Securities and Exchange Commission (CVM), consolidating information previously reviewed manually across multiple systems and reports.
- Built internal automation tools in Python and Power Automate, **reducing time spent on several manual workflows by approximately 50%**, including data preparation, email distribution, and document generation.
- Designed the SQL Server analytics environment using Bronze, Silver, and Gold layers, incremental watermark-based loads, dbt transformations, and Apache Airflow orchestration.
- Manage SQL Server support and administration, troubleshooting performance and availability issues; also lead BI priorities and present project outcomes and results to executive leadership.

Multi Armazéns | Junior Data Analyst

Aug 2022 - Dec 2024

- Developed Oracle and SQL queries for data extraction, transformation, and delivery across ETL workflows and management reporting.
- Built dataflows and data pipelines with Power Query, automating data preparation and transformation for Power BI reporting.
- Developed a Power BI inventory monitoring solution combining data collection, transformation, DAX KPIs, and automated email alerts.
- Structured corporate information sharing through Microsoft SharePoint, organizing access and improving data availability across teams.
