About me

Data professional with experience in data visualization, analytics, and automation, developing dashboards and data storytelling in a clear and strategic way to facilitate analysis and support decision-making. I work on end-to-end analytical solutions, from data modeling, view creation, and data transformation to metric definition, process automation, and business insight generation. I have a proactive profile, with autonomy to identify improvement opportunities, suggest process changes, and structure solutions that increase the quality, scalability, and reliability of analyses. Advanced English for professional and technical contexts.

Jan 2019 - Jul 2022

Work Experience

Nova Capital FIDC, Sr Data Analyst

Jan 2025 - Present

- Developed end-to-end data pipelines in Python, integrating multiple sources via APIs and automating ETL processes.
- Optimized and executed complex queries in SQL Server, improving the performance of reports and analytical systems.
- Designed and deployed Power BI dashboards with an authentication layer, integrating Power Automate for automated distribution and updates.
- Provisioned and configured cloud VMs (Digital Ocean) to host and orchestrate applications such as n8n.
- Implemented intelligent automations, including an AI-powered WhatsApp bot for customer support and lead qualification.
- Tracked sprint deliverables in Microsoft Planner, applying agile practices.

Multi Armazens, Data Analyst

Aug 2022 - Dec 2024

- Collected and ingested data from OracleDB, structuring pipelines for reporting and analytical consumption.
- Developed and optimized SQL queries to support ETL processes and extract actionable insights.

- Implemented Power BI dataflows through Power Query Online, automating data preparation and transformation steps.
- Built end-to-end data pipelines, from database extraction and transformation with M Language and DAX to automated inventory delivery with email alerts.
- Integrated and securely shared corporate data through MS SharePoint, ensuring availability and information governance.

DBK, Financial Business Process Outsourcing

Nov 2021 - Apr 2022

- Performed bank reconciliations.
- Supported business partners in daily financial routines.
- Worked on accounts payable and receivable operations.
- Managed invoice verification, recording, and dispatch.
- Provided support to the accounting department.
- Managed company cards.
